Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's amendment filed on 12/05/08 was entered.

Amended claims 2-7, 10-11, 13-14 and new claims 15-24 are pending in the present application.

In light of the claim amendment, the following species restriction is required.

Species Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(a) CD34+ dendritic precursor cell; and (b) CD11c+ dendritic precursor cell.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

The claims are directed to a method for producing a mature dendritic cell using a precursor cell of dendritic cell encompassing CD34+ precursor cell and CD11c+ precursor cell; an isolated vector containing mature dendritic cell and a method of using the same mature dendritic cell and an isolated precursor of dendritic cell comprising a Sendai virus vector.

The following claim(s) are generic: at least amended claims 2, 11, 13, 20-21 and 23.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Each of the aforementioned species of a dendritic precursor cell is different structurally and has different properties, particularly the degree of differentiation potential, one from the other. Each different structure can be considered to be a "special technical feature"; and therefore the listed species lack the same or corresponding special technical features.
